(54) Title: HIGH-TEMPERATURE SOLDERED EXHAUST HEAT EXCHANGER

(54) Bezeichnung: HOCHTEMPERATURGELÖTETER ABGASWÄRMETAUSCHER

(57) Abstract: The invention relates to a heat exchange device which comprises a first flow path for a first fluid and a second flow path for a second fluid. The components of the inventive heat exchanger are interconnected by material connections (10, 11). Those material connections (10, 11) whose material establishing the material fit is substantially directly exposed to the flow of the first fluid consist of a first connection material and those connections whose material establishing the material fit is not or not directly exposed to the flow of the first fluid consist of a second connection material. The composition of the first and the second connection material is different.

(57) Zusammensassung: Die Ersindung betrifft eine Vorrichtung zum Austauschen von Wärme, welcher einen ersten Strömungsweg für ein erstes Fluid und einen zweiten Strömungsweg für ein zweites Fluid aufweist. Die Bauteile des erfindungsgemässen Wärmetauschers sind durch stoffschlüssige Verbindungen (10, 11) miteinander verbunden, wobei die stoffschlüssigen Verbindungen
